ILLINOIS AGRICULTURAL STATISTICS

Annual Summary - 1983

Bulletin 83 - 1

CROP REPORTING DISTRICTS

For statistical purposes the counties of Illinois are grouped into nine Crop Reporting Districts (shown on the map at right). These groupings represent divisions of approximately equal size with similar soils, growing conditions and types of farming.

Crop Reporting Districts are used in the compilation of most reports. It is not possible to collect sufficient data for each county to make county estimates on a timely basis. It is possible to summarize data at a district level and weight districts together by production percentages to arrive at the best State estimates.

Many data series in this bulletin present estimates for Crop Reporting Districts. Some series are further broken down into county estimates within districts.

Dear Friend:

This 1983 edition of Illinois Agricultural Statistics, compiled by our Federal-State Agricultural Reporting Service, documents the contributions that the more than 100,000 Illinois farm families and the vast network of agricultural support industries make to the over-all economy of the "Prairie State."

Coming from a farm background, as I do, to me the value of this publication is that the information it contains is available to all--not just to those who have the resources available to develop private sets of statistics. Because of the availability of this information, we have access to a valuable management tool.

I would like to express my personal thanks to the many farmers and agribusinesses who voluntarily take the time to provide the data for this publication by reporting on numerous agricultural surveys. It is only through their continued cooperation that accurate, current, and useful crop and livestock statistics can be assimilated and published.

Sincerely,

Larry A. Werries

Dear Friend:

Illinois farmers have taken full advantage of the State's vast expanse of rich soils and its favorable climate to establish it as an agricultural giant. Illinois farmers in 1982 exported to foreign countries more agricultural products, produced more soybeans, used more fertilizer and paid more farm real estate taxes than any other State. The State was second in cash receipts from farm marketings, corn production and pigs raised. It ranked high in wheat production, cattle marketed, milk production and dairy products. Illinois agriculture is also diversified with commodities ranging from fruit and vegetables to sheep and poultry.

The information in this publication shows the value and magnitude of agriculture's contribution to the economy of Illinois. The agricultural data presented is a summary of the various reports prepared and published regularly by the Illinois Cooperative Crop Reporting Service plus some other data series of general interest. Collection and publication of these data have been made possible through the cooperative efforts of the Illinois Department of Agriculture and the USDA Statistical Reporting Service.

This publication would not be possible were it not for the voluntary reporting of individual data by many thousands of Illinois farmers and agricultural related businesses. To them we owe a debt of gratitude and a sincere "THANK YOU." We also thank the field and telephone enumerators who collected much of the information and the office staff who worked so diligently to assemble the data and prepare this publication.

Our main goal is to provide agricultural statistical data that will be of benefit to the agricultural and agribusiness communities. As you use this information we hope you will make suggestions regarding additional information or improvement that would be of benefit.

Sincerely yours,

Fred S. Barrett

Chickens: Inventory, supply and disposition, 1975-82. 92
Chickens: Production and income, 1975-82. 92
Hens and Pullets of Laying Age: Average number on farms during month, 1975-82 93
Rate of Lay: Eggs produced per hundred layers, by months, 1975-82 93
Egg Production: Total number of eggs produced on farms, by months, 1975-82. 93
Eggs: Farm production and disposition, price per dozen, cash receipts and gross income, 1975-82 93
Egg Production: Average number of layers, average rate of lay and total eggs produced, by counties, 1981 and 1982 94
Egg-type chicks: Number hatched by commercial hatcheries, by months, 1975-82. 96
Turkeys: Breeder hens on farms, inventory value, number raised and poults hatched, 1975-82. 96
Mink: Pelt production by color class, 1975-80/82. 97
Milk Cows: Average number on farms, by months, 1975-82. 98
Milk per Cow: Average per milk cow on farms, by months, 1975-82 98
Milk Production: Total milk produced on farms, by months, 1975-82 98
Milk Cows and Milk: Number of milk cows and production of milk, milkfat and butter on farms, 1975-82. 99
Milk and Cream: Farm utilization, marketings, income, and value, 1975-82. 99
Milk Production: Average number of milk cows and production on farms, by counties, 1981 and 1982. 100
Cattle and Hog Marketings: By counties, 1981 and 1982 102
Cash Receipts from Livestock and Products: Total and selected commodities, by counties, 1981. 104
Cash Receipts from Livestock and Products: Total and selected commodities, by counties, 1982. 106
Swiss Cheese (incl.block), Italian Cheese, American Cheese (whole milk) and Other Cheese,
Quantity manufactured, by months, 1975-82. 108
Creamery Butter, Cottage Cheese (creamed), Ice Cream, Ice Milk,
Quantity manufactured, by months, 1975-82. 109
Cattle Slaughter: Calf Slaughter: 1975-82 110
Sheep and Lamb Slaughter: Hog Slaughter: 1975-82. 111
Livestock: Counties leading in inventory numbers. 112

PRICES

Prices. 113
Price Indexes: Index numbers of prices received by farmers, by months, 1975-82. 114
Price Ratios: Ratio of prices received to prices paid and product-feed ratios, by months, 1975-82 116
Field Crop Prices: Average price per bushel received by farmers, by months, 1975-82 117
Hay Prices: Average price per ton received by months, 1975-82 118
District Crop Prices: Season average price received by farmers, by districts, crops of 1975-82. 119
Livestock: Average price per hundredweight received by farmers, by months, 1975-82. 120
Milk and Milk Cow Prices: Average price received by farmers, by months, 1975-82 121
Egg Prices: Average price received by farmers, by months, 1975-82 121
Prices Paid: Average prices paid by farmers, Dec. 15, 1980-82 122

FERTILIZER

All Fertilizer: Consumption by kinds and consumption of primary nutrients, 1975-82. 123
Direct Application Nitrogen Materials: Consumption, 1975-82 123
Direct Application Phosphate, Potash, and Natural Organic Materials: Consumption, 1975-82 123
Fertilizer Sales: By districts, July-December 1981 and January-June 1982. 124
Fertilizer Use on Soybean, Corn and Wheat Acreage Harvested for Grain, 1975-82. 125

FARM LABOR

Farm Labor Force: By quarters, 1975-83. 126
Farm Wage Rates: By quarters, January 1980-July 1983. 126

ORDER FORM 127

ILLINOIS AGRICULTURE

The State of Illinois is blessed with some of the richest agricultural resources in the USA and in the world. Illinois farmers and industries produce abundant supplies of foods and agricultural products that have gained acceptance worldwide.

Illinois lies midway between the Continental Divide and the Atlantic Ocean and some 500 miles north of the Gulf of Mexico. The climate is typically continental with cold winters, warm summers, and frequent short period fluctuations of temperature, humidity, cloudiness and wind direction. The excellent soil and well distributed annual precipitation favor a very high standard of agricultural production.

Agriculture in Illinois has been 150,000 years in the making. During the Ice Age glaciers moved across the continent, leveling the countryside and depositing black, fertile soil over much of the state. These black soils, rich in organic content, yield an agricultural productivity that is unsurpassed. Parts of Illinois untouched by glacial movement reveal hills and valleys bedecked with timber, haystacks and grazing livestock.

Well known as the home of Abraham Lincoln, the state of Illinois has developed a highly diversified economy. America's third largest city, Chicago, lies adjacent to the Great Lakes region in northern Illinois. Beyond the urban industrial areas, more than 100,000 farms with more than 28 million acres of fertile farmland comprise Illinois' largest industry, agriculture.

The variation in soil types, climate and topography make it possible for Illinois farmers to grow a wide variety of crops. Processing vegetables are grown in the northeast, apples and peaches on the ridges where air movement is good, and corn, soybeans, wheat and hay in all parts of the state. Fresh market vegetables, popcorn, potatoes, horseradish and pumpkins are other crops which are grown commercially in Illinois.

Although many farms in the State have become specialized for the production of crops such as corn and soybeans, there are still 50,000 farms that have cattle; 25,000 farms have hogs; 7,500 have sheep; 6,200 have milk cows; and 7,100 have poultry. Cattle are found throughout the state but populations are most concentrated in the Northwest. Milk cow numbers are concentrated in the North and Southwest. Hogs and pigs are on farms throughout the state but the largest populations are in the Western and Northwestern areas of the state. Livestock production contributes nearly a third of the total cash receipts from Illinois farms.

Food and agricultural product processing contribute significantly to the state's economy. Illinois is one of the top ranking states in meat packing, soybean processing, dairy manufacturing, corn processing, feed milling, and vegetable processing.

Illinois' fertile soil, favorable climate, availability of good transportation, and the industry of its people make it a rich agricultural empire.

CLIMATE OF ILLINOIS

Illinois lies midway between the Continental Divide and the Atlantic Ocean and some 500 miles north of the Gulf of Mexico. The climate is typically continental with cold winters, warm summers, and frequent short period fluctuations of temperature, humidity, precipitation, cloudiness and wind direction, primarily in winter. The excellent soil and well distributed annual precipitation of 32 to 48 inches favor a very high standard of agricultural production.

Latitude is the major factor in both temperature and precipitation with the northern counties averaging cooler and drier than the south. Distance from the Gulf of Mexico and lower air mass temperatures both tend to reduce precipitation in the north. Annual precipitation in Southern Illinois is approximately 1½ times that in the extreme north with most of the excess in the south falling during winter and early spring. Average precipitation for December through March in the extreme southeast is about twice that in the extreme northwest, whereas Statewide precipitation from April through September ranges only from about 21 to 24 inches.

Precipitation during fall and winter tends to be distributed uniformly over large areas caused by large storms moving across the continent. In contrast, spring and summer precipitation occurs principally as brief showers or thunderstorms, affecting relatively small areas. This erratic occurrence of warm season precipitation generally results in an uneven spatial distribution.

Sunshine averages more than 70% of the possible total during the three summer months.

Illinois extends nearly 400 miles from north to south, and the January temperature difference between Rockford (north) and Cairo (south) is approximately 12°F in the mean. Temperatures reach zero or below on an average of seven days annually in the extreme North and only one or less in the far South. The lowest temperature of record is -35°F at Mt. Carroll on January 22, 1930.

The north-south mean temperature range in July is only about 6°F since sun angle is more equitable over the State and high relative humidities tend to moderate temperatures. Temperatures reach 90°F or higher on an average of near 20 days annually in the north and about 50 days in the south and west-central. The highest temperature of record was 117°F at East St. Louis on July 14, 1954.

The annual average snowfall ranges from near 30 inches in the extreme north to only 10 inches in the extreme south. The most likely form of winter precipitation in the north is snow, whereas more than 90% of Cairo's winter precipitation falls as rain. Snowfall of 1 inch or more occurs on an average of 10 to 12 days per year in the extreme north and only 3 or 4 in the far south. Snow cover of an inch or more averages about 50 days annually in the north and only about 15 days in the south, exhibiting large year-to-year variation. Central Illinois receives more freezing precipitation than either north or south.

Thunderstorms average about 35 to 50 annually in Illinois, but most cause little or no damage. On occasion they are accompanied by hail, damaging winds, and tornadoes. Hail falls on an average of two or three days annually in any one locality, but only about once every two years during periods when crops are most susceptible to damage. Most hailstorms are too short in tenure or the stones too small in size to cause major crop damage. About 25 tornadoes occur each year somewhere in Illinois, mostly in spring.

The mean frost-free period ranges from less than 150 days in the extreme north to more than 210 days in the extreme south. The mean date of the last spring freeze ranges from April 1 in the extreme south, to May 5 in the extreme north. The mean date of the first fall freeze ranges from about October 1 in the extreme northwest to October 30 in the extreme south. Earliest and latest ever frost dates are about 30 days before and after the mean date. Dates given are average for the district. Locations within the district having similar exposure usually agree within plus or minus five days. Crop damaging freezes are most often associated with radiation freezes. Under such conditions (clear skies and light winds), the temperature may vary 10°F or more at adjacent ridge and valley locations. The tables are based on temperatures in a standard Weather Service thermometer shelter at an approximate height of five feet above ground. Under strong radiational conditions the temperature will be lower at ground level.

FARM INCOME

1982 CASH RECEIPTS DECREASE 1 PERCENT

Corn and soybeans provided over three-fifths of the total cash receipts to Illinois farmers in 1982. Corn sales accounted for 36% of the total cash receipts, up from 33% in 1981. Soybeans accounted for 26% of all cash receipts in 1982, a decrease from 30% a year earlier.

Illinois cash receipts for all commodities in 1982 totaled 7.43 billion dollars, down 1% from 1981. Crop receipts were down 4% in 1982. Higher cash receipts for corn and hay were more than offset by lower receipts from soybeans, wheat, oats, and several minor crops. Livestock receipts increased 7% from 1981, totaling 2.37 billion dollars. Increases in cash receipts for hogs and cattle and calves were primarily responsible for livestock increase. Cash receipts for crops accounted for 68% of the total cash receipts in 1982, compared with 70% in 1981 and 71% in 1980.

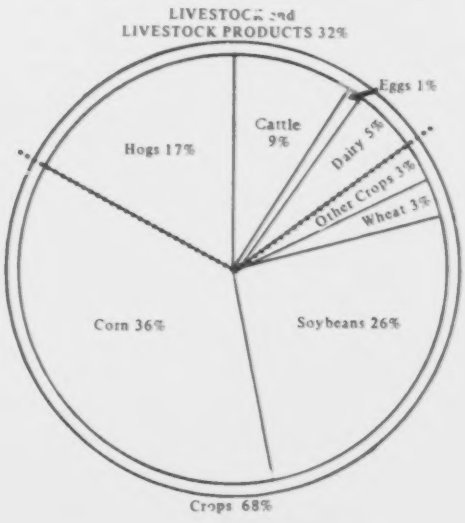
ILLINOIS CASH FARM INCOME BY COMMODITIES 1982



ILLINOIS' POSITION IN THE NATION'S AGRICULTURAL CASH RECEIPTS 1/

Commodity group	Year	U.S. total	Illinois total	Percent of U.S.total	Illinois' rank among States
		- 1,000 dollars -		Percent	
Crops	1982	74,352,750	5,061,913	6.8	2
Livestock	1982	70,198,559	2,372,494	3.4	9
Total	1982	144,551,309	7,434,407	5.1	4

1/ Preliminary.

TOTAL NET FARM INCOME DOWN 44% FROM 1981

Total net farm income of Illinois farmers in 1982 declined 44% from 1981, but was still more than double the net farm income of farmers in 1980. The total net income per farm was $9,738 in 1982, compared with $16,977 a year earlier and $4,348 in 1980.

The 1982 realized net farm income (amount left after deducting farm production expenses from realized gross farm income) was 6% less than in 1981 and 56% less than in 1980, primarily due to the leveling off of gross farm income and the continuing increase of farm production expenses. Gross farm income in 1982 was virtually unchanged from 1981 as lower cash receipts from farm marketings were offset by larger government payments.

REALIZED GROSS FARM INCOME: Illinois, 1975-82 1/

CROPS

Illinois farmers in 1982 harvested the largest total production of all crops in the State's history. Corn production, at 1,525 million bushels, was a record crop and soybean production, at 362 million bushels, was the second best crop ever produced in Illinois. Yields of corn and soybeans in 1982 were at record high levels, with corn averaging 134 bushels and soybeans 39 bushels per acre.

Farmers in Illinois marketed 5,062 million dollars worth of crops in 1982. Corn marketings made up 2,691 million dollars, or 53%, and soybeans accounted for 1,927 million dollars, or 38%, of the total cash receipts from farm marketings. In 1982, receipts from crops represented 68% of the total cash receipts received by Illinois farmers from all farm marketings. Illinois ranked second in the Nation in cash receipts from crops in 1982.

The Agriculture industry in Illinois supplies crop and crop products to much of the world. In 1982, Illinois was the leading State in the Nation in exports of corn, soybeans, and their products. Exports of feed grains and their products (primarily corn) totaled 1,371 million dollars in 1982 while soybeans and soybean products amounted to 1,482 million dollars. These two crops accounted for 86% of the total value of all agriculture exports (crop and livestock) from Illinois in 1982.

FIELD CROPS

Illinois in 1982, produced the largest quantity of total crop ever harvested in the State -- up 3% from 1981 and up 29% from 1980. Illinois farmers in 1982 produced the largest corn crop ever and the second largest soybean crop. While not at record high levels, 1982 was also a good year for most other crops grown in Illinois. Corn and soybean production continues to trend upward, while wheat production has held fairly steady to up slightly. Oat production in Illinois continues to decline.

Farmers in Illinois harvested 23,923,000 acres of crops in 1982. In most recent years, when cropland has been fully utilized and there is no government crop acreage reduction programs in affect, Illinois farmers have usually harvested about 24 million acres.

The table below shows the "All Crop Production Index" with the base period, 1977=100.

CROP PRODUCTION INDEX, 1960-82

CROP DEVELOPMENT AND WEATHER 1982

CROP DEVELOPMENT

Weather during 1982 was generally wet with temperatures slightly lower than normal. Small grain production was lower than 1981's record crop while corn yields set a new record and soybean yields tied 1979's record. Cool, wet weather slowed spring plowing and seeding of oats through March and early April. Improved weather in late April allowed field preparation for row crops to be completed in early May. Favorable weather in May allowed corn and soybean planting to make rapid progress with corn virtually complete by late May. Soybean planting was almost complete by mid-June when rain delayed completion slightly.

The 1982 winter wheat crop was planted at a slower than normal pace in the Fall of 1981. Planting started in mid-September, but fell behind the 5-year average in mid-October when rains occurred in the wheat-producing areas and was not completed until late November. This was several weeks behind the average completion date. The severe winter weather of 1981-82 damaged the crop and caused above average winterkill while standing water and flooding caused additional damage in the early spring. Improved weather in the late spring allowed the crop to make good progress. However, cooler and wet weather in June and July slowed maturity and hindered harvest in some areas.

Corn planting began during the last week of April, which is about the average starting time for the State. Good conditions allowed planting to make rapid progress during May and to be completed ahead of average. A good supply of moisture and near normal temperatures allowed the corn to make good progress during the growing season with development ahead of normal. Warm, dry weather during the fall provided excellent harvesting conditions and allowed corn producers to complete harvest by mid-November.

Soybean planting began early in May and made rapid progress through the month. Rain in mid-June slightly delayed planting the last of the crop. As with corn, excellent growing conditions through the summer allowed the soybean crop to make rapid progress with development ahead of average. Harvest began in mid-September, and with favorable weather, made rapid progress. By early November, harvest of the soybean crop was virtually complete.

Oats seeding began in early April, several weeks later than the average, because of the cool, wet weather. However, seeding made rapid progress and was virtually complete by the first week of May, slightly ahead of average. Growing conditions were favorable but storm damage in June and July increased field losses. Harvesting of oats began in early July, later than usual, and was completed by mid-August.

Planting of the 1983 wheat crop started in mid-September, about the usual starting time, and made good progress through the fall. Virtually all of the wheat acreage was planted by mid-November. Mostly adequate supplies of soil moisture aided emergence of the wheat with the crop in good to excellent condition in mid-November. The heavy rains in early December caused some flood damage to low-lying fields. Plowing of 1983 corn and soybean acreage progressed at a normal pace through the fall and was 65% complete by the end of 1982, slightly behind the average.

WEATHER

Precipitation: Total precipitation for the year was greater than normal over the entire State, with the largest differences found in the extreme Northeast, West, Central, and South. The largest difference from normal was recorded at Anna, with 65.99 inches of precipitation (20.35 inches greater than normal)!

The winter of 1981-82 had eight severe winter storms during January, a new record number. From January 29 to 31, over 7 inches of rain fell in Southern Illinois. Heavy snow was recorded from this same storm in South-Central and Central Illinois, including 20 inches at Red Bud. Record snow depths continued through February, with 33 inches recorded at Nashville, a situation which set the stage for severe flooding in Southern Illinois.

March precipitation was above normal, with one winter storm moving across Northern Illinois, resulting in flooding along the Kankakee River. Two April storms (5th, 7-8th) brought record snowfall for the month at several locations, particularly in Northern and Central Illinois. During the storm of April 2-3, severe winds with a strong cold front were observed throughout the State, with speeds as high as 65 mph in Northern Illinois.

June and September Statewide precipitation was below normal by about 0.6 inch, whereas July was above normal for the State (by about 2 inches). Precipitation during August and October was near normal. November began a trend to above normal precipitation, with Chicago receiving 4.89 inches more than normal, and Springfield 2.57 inches greater than normal. December continued with much above normal precipitation throughout the State, Chicago again receiving 6.46 inches more than normal, and DuQuoin 9.99 inches greater than normal! This situation led to tragic and sustained flooding beginning in the first week of the month and reinforced by heavy precipitation over the holidays.

Temperatures: For 1982 as a whole, Illinois experienced slightly lower than normal temperatures, with the greatest anomalies found in the Northeast (-1.6F at Marengo, -2.5F at Watseka) and Southern Illinois (-1.3F at DuQuoin). The remainder of the State was nearer to normal for the year as a whole.

Record cold was experienced across the State on January 10-11 (-26F), on January 16-17 (Northwestern and Eastern Illinois 11.9F below normal), and January 26 when the Statewide average was 10.1F below normal. During the first two cold episodes many locations in Northern and Central Illinois experienced wind chill factors below -70F! February was colder than normal again with record cold temperatures set at many locations on the 6th and the 10th. Although March was near normal in temperature, April was very cold with record minimum temperatures set in many locations on the 6th. May was much warmer than normal (+5.3F in the East, and +4.6F Statewide), followed by a very cold June, a situation which resulted in May's mean temperature being greater than that for June! July and October were near normal, with August and September from about 2 to 3F below normal. As we moved into the winter season, November was slightly above normal (Peoria 1.7F above normal), and December was much above normal over the entire State, with maximum values being 9.6F greater than normal at Peoria and 7.7F above normal at Urbana.

CROP DEVELOPMENT AND VARIETY INFORMATION

Crop development information is collected and published each week during the crop preparation and growing season in the Weekly Weather-Crop Bulletin. In this section, planting and harvesting information for major crops is summarized along with selected information on crop maturity.

Also included in this section are data on leading varieties of soybeans and wheat.

SOYBEAN VARIETIES

Williams continues as the leading soybean variety in Illinois, accounting for nearly one-third of the State acreage at 32% in 1980. This proportion is down from 35% in 1978, the last time a Soybean Variety Survey was conducted. Amsoy, including Amsoy 71, and Woodworth are tied for second, each accounting for 7% of the State acreage. Wells, with 6%, is the fourth most popular variety followed by Corsoy with 5%. Corsoy is the most popular variety in the Northwest and Northeast Districts. Amsoy leads all other varieties in the East District. Williams is the leading variety in all other districts.

The most popular soybean row width in Illinois is 30 inches, accounting for 45% of the acreage planted. The standard small grain 7-inch drill row width (part of the under 10-inch category) is the fastest growing row width size in Illinois, with 6% of the acreage compared to 3% in 1978.

FRUIT

1982 APPLE PRODUCTION

Illinois commercial apple production totaled 88 million pounds (2,095,000 bushels, 42-pound equivalents) in 1982. Production was down 15% from last year's 103 million pound crop and 13% less than 1980's 101 million pound crop. Total value of the 1982 crop is estimated at $11,704,000, down from last year's $13,184,000. The total crop value was down despite higher prices because of the lower production. The 1982 average price per pound is 13.3 cents compared to 12.8 cents the previous year and 12.1 cents in 1980.

Illinois apple production suffered considerable damage last winter and spring from the unusually cold weather. Also, hail and wind damaged the crop in some areas during the growing season while disease problems in some orchards further reduced production. Adequate moisture and mild temperatures late in the growing season aided the crop development and harvest.

APPLES: Production, price and value, Illinois, 1975-82

Year	Production		Price per pound	Value of utilized production

1982 PEACH PRODUCTION

There was no commercial peach crop in Illinois for 1982 as a result of the extremely cold temperatures that occurred in January and February of 1982. The cold weather destroyed the fall-formed fruit buds and caused additional damage to some peach trees. In 1981, peach production totaled 22.0 million pounds (458,000 bushels, 48-pound equivalents). The average price per pound for the 1981 crop was 21.4 cents and the total value was $4,710,000.

1982 SWEET CORN FOR PROCESSING

Total production of sweet corn for processing during 1982 in Illinois was estimated at 187,400 tons, 11% below the previous year's production of 211,000 tons. Harvested acreage was 38,400 acres, compared to 38,300 acres in 1981. Value of the crop was $12,761,000, down 21% from the 1981 value of $16,165,000.

LIVESTOCK, DAIRY AND POULTRY

Illinois' cattle, hog, and sheep producers received $1.95 billion from marketings in 1982, 9% above the 1981 total. Cattle, hog, and sheep cash receipts in 1982 from marketings and sale of farm slaughter were $661.64 million, $1.28 billion, and $9.98 million, respectively. This compares with 1981 receipts of $641.28 million for cattle, $1.14 billion for hogs, and $7.74 million for sheep.

Egg producers in Illinois had cash receipts of $55.5 million in 1982, a decrease of 11% from 1981 cash receipts of $62.6 million.

Cash receipts from dairy products in Illinois totaled $352.2 million in 1982, just 1% below the 1981 cash receipts of $355.0 million.

All livestock and products in Illinois generated total cash receipts of $2.4 billion in 1982, up 9% from the 1981 total cash receipts of $2.2 billion.

CATTLE

All cattle and calves on Illinois farms totaled 2.8 million head at the beginning of 1983, virtually unchanged from a year earlier. This inventory was valued at $1.12 billion, a slight decrease from January 1, 1982. The counties leading in the number of all cattle on farms on January 1, 1983 were Stephenson, 105,800; Jo Daviess, 104,200; Ogle, 90,100; Carroll, 87,100; Henry, 79,000.

The number of beef cows on Illinois farms January 1, 1983 totaled 722,000, a drop of 11% from the year earlier level of 808,000. The top five counties in beef cow numbers were Jo Daviess, 23,100; Adams, 22,900; Fulton, 22,700; Pike, 22,500; Knox, 21,900.

The number of milk cows on January 1, 1983 was 2% below the year ago level, 230,000 head compared to 234,000 on January 1, 1982. The five leading counties in milk cow numbers on January 1, 1983, were Stephenson, 35,300; Jo Daviess, 22,200; Clinton, 17,700; McHenry, 15,500; Washington, 9,500.

The 1982 calf crop was down 7% from the 1981 level to 830,000 head from 890,000.

The number of cattle and calves on feed January 1, 1983 for the slaughter market was 530,000 head. This was an increase of 10% over the January 1, 1982 level of 480,000 head. The cattle on feed inventory consisted of 299,000 steers and steer calves and 231,000 heifers and heifer calves. Both numbers were up from a year ago, 6% and 17% respectively.

The number of cattle and calves marketed during 1982 totaled 1,309,000 head. This was an increase of 7% over the 1981 level of 1,227,000 head marketed. The number of cattle and calves on feed marketed during 1982 totaled 910,000 head. This was a decrease of 2% from the 1981 level of 925,000 head marketed.

HOGS AND PIGS

Illinois hog producers had 5.60 million hogs and pigs on hand December 1, 1982, down 13% from the 6.45 million level a year earlier. The inventory consisted of 767,000 breeding stock and 4,833,000 market hogs and pigs.

The counties leading in hog and pig numbers on December 1, 1982 were Henry, 311,900; Pike, 232,300; Adams, 180,600; Knox, 157,900; Bureau, 138,200.

The average value per head for hogs and pigs on hand December 1, 1982 was $96.00, an increase of $25.50 from the previous year figure of $70.50. This increase in value accounted for the 18% rise in total value to $537,600,000, since actual inventory decreased between December 1, 1981 and December 1, 1982.

Farrowings for the period December 1981 through November 1982 totaled 1,295,000, a decrease of 10% from a year earlier. The average number of pigs saved per litter over the same period was 7.07, compared to 7.14 the previous period.

The December 1981 through November 1982 pig crop was 9,155,000, down 11% from a year earlier. Hog and pig marketings in 1982 totaled 9,768,000 head, down 3% from the 1981 level of 10,083,000.

1/ ANNUAL ESTIMATES COVER PERIOD DECEMBER 1 PREVIOUS YEAR THROUGH NOVEMBER 30.

SHEEP AND WOOL

The number of sheep and lambs on Illinois farms January 1, 1983 totaled 155,000, down 21% from the previous year level of 195,000. This was the first decline in inventory in three years. The top five counties in stock sheep numbers on January 1, 1983 were Henry, 4,600; Adams, 4,500; Ogle, 4,400; Woodford, 4,300; La Salle, 4,200.

An estimated 133,000 lambs were born during 1982, compared with 143,000 during 1981, for a decline of 7%.

The value per head for stock sheep declined $3.50, to $56.50 on January 1, 1983. The total value of all sheep and lambs fell 25% from January 1, 1982 to January 1, 1983 to $8,758,000.

The estimated 208,000 sheep shorn in Illinois during 1982 produced an average weight per fleece of 6.7 pounds for a production total of 1,385,000 pounds of wool. This is in comparison with the 192,000 head shorn in 1981 with an average weight per fleece of 6.8 pounds for a total of 1,307,000 pounds of wool. The average price per pound for wool fell 36 cents during 1982, from 70 cents in 1981 to 34 cents in 1982. The value of wool production decreased 49 percent, from the $915,000 in 1981 to $471,000 in 1982.

An estimated 220,000 head of sheep and lambs were marketed in 1982, up 29% from the 170,000 marketed in 1981.

POULTRY AND EGGS

The total number of chickens on hand (excluding broilers) in Illinois December 1, 1982 was 6.05 million, a slight decrease from December 1, 1981. The total value of the chicken inventory increased 5% from December 1, 1981 to December 1, 1982 to $10.59 million.

The average number of layers on all Illinois farms during 1982 was 4.81 million, a decline of 7% from 1981. The counties leading in average number of layers during 1982 were Iroquois, 789,500; Clinton, 713,400; Livingston, 255,000; Will, 237,200; Lake, 203,800.

Egg production during 1982 totaled 1.16 billion eggs, down 8% from the 1981 total of 1.26 billion eggs. The laying rate during 1982 averaged 241 eggs per layer, slightly lower than last year.

Turkey production in Illinois dropped off significantly during 1982, decreasing 29% from 407,000 in 1981, to 291,000 in 1982. The average price per pound increased during 1982 to 41.0 cents, from 38.0 cents in 1981.

DAIRY

MILK PRODUCTION

The estimated 232,000 milk cows on Illinois farms during 1982 produced 2,657 billion pounds of milk. This compares with the 233,000 milk cows on hand during 1981 with production of 2,604 billion pounds of milk. The annual average milk produced per cow was 11,453 pounds, 2% above the 11,176 pound average in 1981.

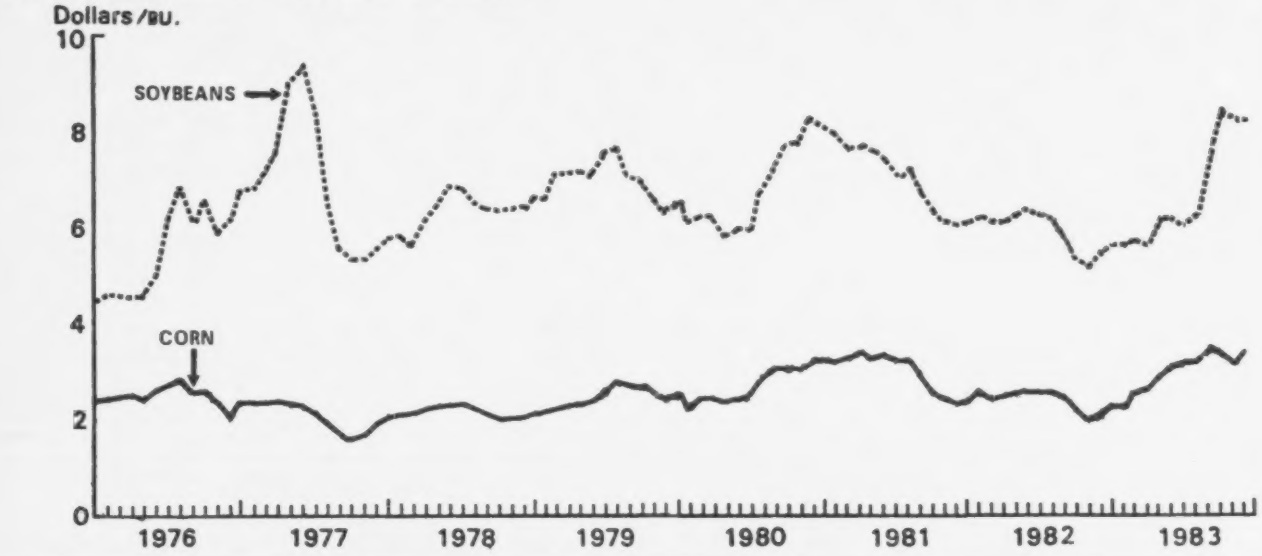
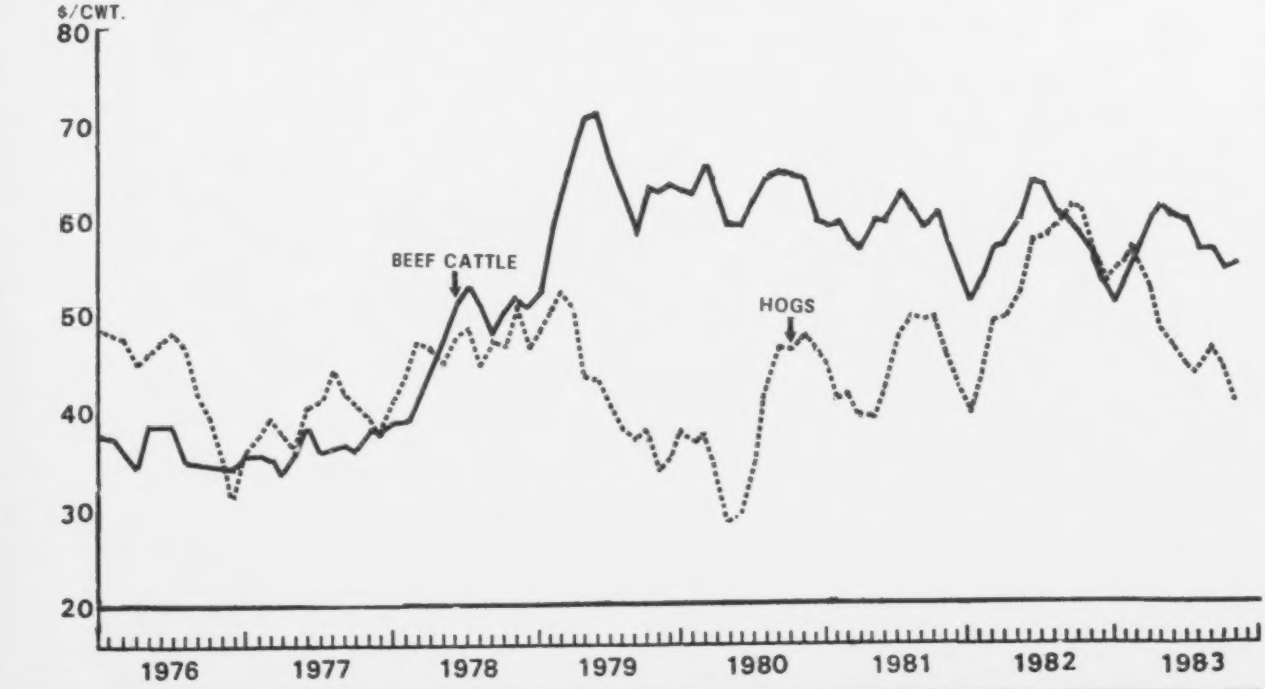
PRICES

PRICES RECEIVED BY FARMERS, ILLINOIS



Prices Received by Farmers, ILLINOIS



1982 CROP AND LIVESTOCK INDEXES

The Illinois Prices Received Index has been computed from 1956 to the present using new quantity weights each year. The Illinois Index relies on weights based on the average value and quantity of each commodity sold during a previous 5-year period.

The all farm products index of prices received by farmers in 1982 was 109% of it's base period, 1976 through 1980. This was 12% below the 1981 index and 10% below 1980. The decline was caused by lower crop prices which more than offset higher livestock prices. The index started in 1982 at 110 and remained steady through March before rising to a high of 117 in May. It then declined through the summer and reached a low of 98 in October. By the end of 1982, the index had risen to 104.

The index of prices received for crops, at 101% of it's base period, was 19% lower than 1981 and 14% below 1980. The crop price index started the year at 109 and then declined to 105 and remained at near this level for a few months. After improving slightly in the late spring, record crops harvested caused prices to again fall with the index reaching the years low of 85 in October. By the end of 1982, the index had risen to 91. The index of prices received for livestock and livestock products for 1982, at 126% of its base period, was 2% higher than 1981 and 1% higher than 1980. It started the year at 111 and rose to a high of 134 in August and September. However, by December, the index had declined to 120.

1/ Annual average is for December previous year through November current year.

PRICES PAID

Prices paid by farmers for major production items are collected from dealers and merchants at regularly recurring intervals by means of telephone and personal interviews. This information provides a historical series of prices paid for important production goods and services but perhaps more importantly provides cost data used in calculating the index of prices paid by farmers at the U.S. level. Also included in the index of prices paid are interest, taxes and wage rates. The index of prices received for all farm products sold, when divided by the index of prices paid gives a measure of what farm products will buy in terms of production needs such as fertilizer and machinery, and family living items.

The table below shows average prices paid by Illinois farmers for selected feeds and motor supplies in 1980 thru 1982. Beginning in January 1977, the Bureau of Labor Statistics Consumer Price Index (CPI) was used to measure farmers' costs for family living items. Therefore, data on family living costs are no longer collected by the Department of Agriculture.

State or regional prices paid for feed, seed, fuels, and fertilizer, and U.S. prices for all commodities are published currently in AGRICULTURAL PRICES, a monthly report of the Statistical Reporting Service of the U.S. Department of Agriculture, Washington, D.C., 20250. Regional prices for building materials, farm machinery, farm supplies, pesticides, and motor supplies other than fuels are also published currently in AGRICULTURAL PRICES.

PRICES PAID: Average prices paid by Illinois farmers, December 15, 1980-82 1/

Item and unit	1980	1981	1982
		Dollars	
		Feed	
Soybean meal, 44% protein, 100 lbs.	17.00	14.00	13.50
Laying feed, per ton	245.00	205.00	200.00
Chick starter feed, per ton	265.00	235.00	225.00
Dairy feed, 16% protein, per ton	215.00	196.00	200.00
Hog concentrate, 38-42% protein, 100 lbs.	17.60	15.70	15.30
Beef cattle concentrate, 32-36% protein, 100 lbs.	13.50	12.10	12.70
		MOTOR SUPPLIES 2/	
Gasoline, filling station, unleaded, per gal.	1.30	1.41	1.32
Diesel fuel, per gal.	1.03	1.22	1.17
Motor oil, all-weather, (high detergent) per gal.	5.50	5.60	5.90
Grease, 35-lb. pail	32.00	34.50	37.00
Tires, auto, each			
Bias-belted, G78-15	52.00	3/52.00	3/52.00
Radial, steel belted, P 195/75 R 14, ER 78-14 4/	80.00	74.00	73.00
Tires, truck, 9.00 - 20, 10-ply, each	175.00	185.00	180.00
Tires, tractor, rear, 15.5 - 38, 6-ply, each	305.00	340.00	350.00
Storage batteries, CPR 220-310 AMPS	57.00	53.00	53.00
Anti-freeze, permanent, per gal.	5.30	5.20	4.90

1/Averages at independent and chain stores. 2/October 15. 3/Tire size - E 78-14.
4/Tire size - Prior to 1981, 205-15, GR 78-15.

OTHER DATA SERIES

This section contains data series which did not fall under other major category headings. Included in this section are fertilizer information, and farm employment and wage rates.

1/ This fertilizer information was obtained when interviewing farm operators for Objective Yield Surveys conducted by the Statistical Reporting Service and are not official estimates of total fertilizer use. The samples are relatively small and the data are subject to sampling fluctuation. 2/ Percentages apply to acres receiving fertilizer, not to total acres harvested.

1983							
July	3.76	3.48		3.69	4.14		1/

1/Insufficient data for this category. 2/Quarterly surveys discontinued. 3/Not surveyed starting in July 1982.

ORDER FORM

The following publications are available on an annual subscription basis from the Illinois Cooperative Crop Reporting Service. Subscription fees are not refundable.

Free copies of these reports are available to the News Media, Illinois farm operators and other respondents supplying information for compilation of the reports.

Paid subscriptions will be distributed by first class postage.

HOW TO ORDER:

Check the title of each report you wish to order, enter the subscription rate in the space provided and total cost at the bottom of the column.

Publications	Annual Subscription Rate United States	Foreign	Enter Amount Enclosed for Each Publication Ordered
☐ **ILLINOIS FARM REPORT** Four page bi-weekly report issued about the 12th and 26th of the month containing data on crop acreages, production, grain stocks, livestock, fruit, vegetables, prices, farm labor and fertilizer sales.	$10.00	$12.50	$ _____
☐ **ILLINOIS WEATHER & CROP** Weekly report on crop conditions and weather data from planting thru harvest; monthly for the rest of the year.	$12.00	$15.00	$ _____
☐ **ANNUAL SUMMARY - ILLINOIS AGRICULTURAL STATISTICS -** A summary of all information issued during the previous year with historical data for comparison plus county data on harvested acreage and production of crops and livestock numbers. The Annual Summary package includes supplemental mailings of county estimates for corn, soybeans and wheat.	$ 5.00 (No charge to) (Illinois residents)	$ 6.25	$ _____
☐ **ILLINOIS TIMBER PRICES** Semi-annual one sheet report on timber prices by species and region.	No Charge		
TOTAL SUBSCRIPTION FEES.....			$ ☐

Make check or money order payable to **USDA/SRS**
Send this order form with remittance to:

Reports Issued by Illinois Crop Reporting Service

Commodity	Approximate date of report	Source of data for estimates
Field Crops:		
Winter wheat seedings	December	Farm operators
Prospective spring plantings	February	Farm operators
Harvested acreage forecasts	July	Farm operators
Yield & production forecasts	Monthly during growing season	Farm operators Field measurements 1/
Annual crop summary	January	Farm operators
Stocks of grain (farm and off-farm)	January, April, June, September 2/ October	Farm operators and mills & elevators
Weather-Crop	3 P.M. Monday - April thru November	Local observers
Fruit:		
Peach production	June, July, August, January	Fruit growers
Apple production	July, August, October, January	Fruit growers
Vegetables:		
Fresh market, acreage and production	July, December	Vegetable growers
Processing, acreage and production	March, June, September, December	Vegetable processors
Meat Animals:		
Cattle inventory and calf crop	February	Farm operators
Sheep inventory	February	Farm operators
Hog inventory and pig report	March, June, September, December	Farm operators
Cattle on feed	January, April, July, October	Farm operators
Sheep and lambs on feed	January	Farm operators
Lamb and wool crop	March	Farm operators
Commercial slaughter	Monthly	Livestock slaughter plants
Poultry:		
Chicken inventory	February	Farm operators Hatcheries
Turkey inventory	January	Farm operators Hatcheries
Egg production	Monthly	Farm operators Commercial egg producers
Chicks hatched	Monthly	Hatcheries
Milk:		
Milk production	Monthly	Milk producers
Dairy products manufactured	May	Milk product manufacturers
Prices:		
Prices received by farmers	Monthly	Farm product buyers
Prices paid by farmers for feed	Monthly	Merchants
Timber prices	April, October	Timber buyers
Farm Employment:		
Employment on farms and farm wage rates	August	Farm operators

1/Counts and measurements from small plots at monthly intervals prior to maturity. Mature grain and soybeans harvested and subjected to detailed laboratory analysis. 2/Soybeans only.

Reports available on request from: Illinois Cooperative Crop Reporting Service
